### **REASONS FOR ALLOWANCE**

Examiner acknowledges a submission of the amendment and arguments filed on January 29, 2004. Claims 1 – 5, 7 – 14 and 16 - 24 are deleted; Claims 6 and 15 are amended. Amendment and arguments have overcome rejections under 102 (b) and 103(a).

#### ***Final Status withdrawal***

The Amendment filed on January 29, 2004 placed the Application in condition for Allowance. Therefore, the finality of the Office Action is withdrawn.

\*\*\*

The following is an examiner's statement of reasons for allowance:

An amended independent Claims 6 and 15 disclose, inter alia, a following limitation: the leakage current of the of the input protection is reduced due to reverse source bias and the leakage current of the said transistor is reduced to below sub-threshold level while increasing source voltage applied at said source terminal reduces the gate-to-source voltage and increases its threshold voltage said source voltage being a few 100 mV; and wherein said leakage current is approximately  $10^{-14}$  A/um of transistor width.

The closest reference for the claim is Smith, which discloses structure similar to the claimed. However, careful analysis shows that the Smith circuit is unable to provide

recited leakage current, since the bipolar transistor in the circuit having its base (floating, in a best case) must have its leakage current substantially higher than the recited value. Examiner agrees with the Applicant that practical realization of the Smith reference diodes will lead to solutions with leakage substantially current higher than the recited value. The Smith reference cannot satisfy the functional limitation of the leakage currents values as recited above.

Allowability resides, at least in part, in the above-described limitations, which has not been disclosed in the Prior Art in a search.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
